# PILOT INSTRUMENT CERTIFICATE APPLICATION AND FLIGHT CHECK FORM

## Application

Application is hereby made for Instrument Pilot Certificate { AAF Form 8 (white) } (Strike out one.)  
AAF Form 8A (green)

Name Gardner J. H. Rank 1st Lt Organ. 1537

Pilot rating 1A Total Instrument Pilot time \_\_\_\_\_

Instrument Pilot time last 5 years: Under hood \_\_\_\_\_ Actual \_\_\_\_\_ Total \_\_\_\_\_

The above is true to the best of my knowledge and belief.

Signed Jack H. Gardner

JACK H. GARDNER  
Rank 1st Lt. AIR CORPS

Date 29, July, 1945

## Check Pilot Flight Test Report

(See reverse side for description of maneuvers)

Maneuvers	Satisfactory	Unsatisfactory
1. Instrument take-off . . . . .	_____	_____
2. Spiral climb . . . . .	<u>X</u>	_____
3. Level flight . . . . .	<u>X</u>	_____
4. 90° and 180° turns . . . . .	<u>X</u>	_____
5. Steep banks . . . . .	<u>PROH</u>	_____
6. Stalls . . . . .	<u>X</u>	_____
7. Recovery from unusual maneuvers . . . . .	<u>X</u>	_____
8. Glides . . . . .	<u>X</u>	_____
9. Radio range orientation and low approach . . . . .	_____	_____
10. Position plotting by intersection . . . . .	_____	_____
11. Aural null orientation and homing . . . . .	_____	_____
12. Radio compass low approach . . . . .	_____	_____

NOTE.—To qualify for Instrument Pilot Certificate, AAF Form 8 (white), the applicant must satisfactorily complete maneuvers Nos. 2 to 9, inclusive, except that in the case of combat crew pilot in OTU and/or RTU organizations having radio compasses as standard equipment on their aircraft, maneuver No. 9 may be omitted. To qualify for Instrument Pilot Certificate, AAF Form 8A (green), applicant must satisfactorily complete all maneuvers.

This is to certify that I have personally flight-checked the above applicant on C 47  
aircraft and find him qualified—~~unqualified~~—

Signed Cunningham

(Authorized check pilot)

Rank Capt. A.C.

Date 29 July 1945

Passed oral examination in accordance  
with AAF Reg. 50-3 Par. 3, 29, July, 1945

(Applicant must qualify "Satisfactory" on each separate maneuver)

## PILOTS' INFORMATION FILE TEMPORARY RECORD OF COMPLIANCE

April 1, 1945

AAF Reg. 62-15 requires all AAF pilots, flight surgeons and aviation medical examiners, and flight engineers, in the United States, to certify that they have read and understand all instructions contained in PIF revision sheets listed and numbered below.

When you receive the PIF material listed below, sign the bottom portion of the form, detach at the dotted line, and return the receipt (properly executed) to your Operations Officer.

AAF Reg. 15-24 requires that within 30 days

after you receive this revision you must do the following:

- (1) Read the revision so that you understand it.
- (2) **Remove and destroy** the sheets of your PIF that are listed on the envelope containing this revision.
- (3) Place the revision sheets in **their proper places** in your copy of PIF.
- (4) Sign the compliance certificate (upper section) and turn this form over to your Operations Officer so that it may be placed in your Form 5 file.

### CERTIFICATE

(To be turned over to the Operations Officer at your home station)

I certify that I have:

- a. Read and understand the following PIF revisions and/or additions contained in **REVISION No. 17, dated April 1, 1945.**

3-8-7	Breaker Page Sec. 5	5-2-3	5-5-2
3-8-8	5-1-1	5-3-1	5-6-1

Rank Capt. A.C.

Date 29 July 1945

(Applicant must qualify "Satisfactory" on each separate maneuver)

## DESCRIPTION OF MANEUVERS

1. *Instrument take-off.*—The check pilot will align the airplane with the runway. Pilot will set directional gyro either to zero or the nearest 5° indice of the runway heading, and will take off. Proficiency will be based on ability to hold heading within 3° either side of initial heading and by smoothness of attaining climbing air speed safely.
2. *Spiral climb.*—The pilot will put the airplane in a standard climbing spiral to the right. After climbing 1,000 feet, he will reverse the direction of turn and climb 1,000 feet more. Proficiency will be based on constant rate of turn, maintenance of proper rate of climb, air speed, and smoothness.
3. *Level flight.*—The pilot will fly on a given compass heading for 5 minutes. Proficiency will be based on ability to maintain straight and level flight.
4. *90- and 180-degree turns.*—The pilot will make turns in each direction. Accuracy, maintenance of constant altitude, and smoothness of control determine proficiency.
5. *Steep banks.*—The pilot will put the airplane in a bank of 40 to 60 degrees, maintain this bank until a smooth turn is achieved, then return to straight and level flight. No specific amount of turn is required. Proficiency will be based on smoothness of turn and maintenance of constant altitude and safe air speed.
6. *Stalls.*—The pilot will place the airplane in a glide without flaps with engine completely throttled, slowly reduce the air speed to a complete stall, then regain normal gliding speed. Proficiency will be based on avoidance of any tendency toward a second stall during recovery and on ability to hold the airplane from turning or dropping a wing before the stalling point is reached.
7. *Recovery from unusual maneuvers.*—The check pilot will place the airplane in an unusual position, then instruct the pilot to take the controls, recover, and resume level flight. Proficiency will be based on ability to recover quickly, smoothly, and reliably; emphasis will be placed on avoidance of diving and stalling during recovery. Type of aircraft will govern the extent of unusual maneuvers; check pilot will use judgment in the execution and allowance for recovery.
8. *Glides.*—The pilot will place the airplane in a power glide without flaps, with appropriate air speed, safely above stalling speed, and make at least one 90° turn in each direction. Proficiency will be based on ability to maintain constant air speed and vertical speed and to execute turns smoothly.
9. *Radio range employment and orientation.*—(Use all instruments.) This portion of the test will start from a position unknown to the pilot and within 10 minutes of the radio range station. It will consist of tuning the radio to the station, orientation, and bracketing of beam and following it to the radio range station, recognition of the station, and a let-down using the standard procedure for that range and station.
10. *Position plotting by "intersection."*—Take bearings on at least two stations (three, if possible) and plot position on D/F chart.
11. *Aural null orientation and homing.*—Using aural null locate station and home. (Synthetic trainers may be used for position plotting by intersection and aural null orientation and low approach, provided ADF or loop equipment is not available on aircraft utilized for test.)
12. *Radio compass low approach.*—This portion of the test is to emphasize the simplicity of executing low approaches using the radio compass in COMP. position. Follow needle to station, turn to reciprocal of station to field course (terrain permitting). Lose  $\frac{2}{3}$  excess altitude out-bound, execute procedure turn, lose remaining excess, cross station, and make final descent to minimum altitude over field. Procedure will closely approximate standard low approach but no reference is made to range legs for lateral corrections of course or headings.

WAR DEPARTMENT  
THE ADJUTANT GENERAL'S OFFICE  
WASHINGTON 25, D. C.

15 October 1945.

SUBJECT: Appreciation.

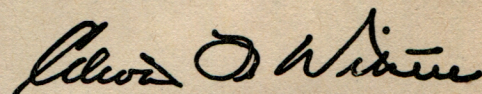

To: Jack Harding Gardner, O-520497, 1st Lt., AC  
Route #2, Box #96,  
Gridley, California

1. It is desired to express to you the appreciation of the War Department for your continued service to National Defense by your acceptance of an appointment as an officer in the Reserve Corps. Your aid and that of the other veteran officers who, like you, are displaying an active interest by remaining in the Reserve will be invaluable in building and maintaining a sound and effective postwar Army. You and your comrades by your counsel, your leadership, and your wholesome influence on public opinion may well make the difference between mediocrity and complete success.

2. AR 140-5 and the other Army Regulations governing the Officers' Reserve Corps necessarily will be revised to conform with such statutes as may be enacted to govern the postwar Army. The revised regulations and other information concerning the Officers' Reserve Corps will be made available in the future.

3. As soon as the press of work permits, a formal commission evidencing your appointment will be mailed to you.

BY ORDER OF THE SECRETARY OF WAR:

EDWARD F. WITSELL  
Major General  
Acting The Adjutant General

ARMY AIR FORCES  
Certificate of Appreciation  
FOR WAR SERVICE

TO

Jack H. Gardner

**I** CANNOT meet you personally to thank you for a job well done; nor can I hope to put in written words the great hope I have for your success in future life.

Together we built the striking force that swept the Luftwaffe from the skies and broke the German power to resist. The total might of that striking force was then unleashed upon the Japanese. Although you no longer play an active military part, the contribution you made to the Air Forces was essential in making us the greatest team in the world.

The ties that bound us under stress of combat must not be broken in peacetime. Together we share the responsibility for guarding our country in the air. We who stay will never forget the part you have played while in uniform. We know you will continue to play a comparable role as a civilian. As our ways part, let me wish you God speed and the best of luck on your road in life. Our gratitude and respect go with you.

A large, stylized handwritten signature in black ink, likely belonging to the Commanding General.

and subject to the approval of the Administrator of Civil  
Aeronautics, find that he (she) meets the physical require-  
ments prescribed for

"SECOND"

CLASS

DATE OF EXAMINATION: 3/14-46

By direction of the Administrator:

V.M. H. G. R.  
AUTHORIZED MEDICAL EXAMINER

Any Alteration of This Certificate Is Punishable by a Fine of Not Exceeding Three Years, or Both.

CONDITIONS OF ISSUE

This Certificate is to be retained by the holder with his  
Airman Certificate unless it is recalled by proper authority,  
or is voluntarily surrendered.

OPERATION DURING PHYSICAL DEFICIENCY

The holder shall not exercise the privileges of his Airman  
Certificate during the period of a known physical deficiency  
which would render him during that period unable to meet  
the physical requirements with which he complied in order  
to secure his certificate, provided, that a pilot may operate  
an aircraft other than for hire during a period of TEM-  
PORARY physical deficiency if the aircraft is equipped with  
fully functioning dual controls and the other seat is occu-  
pied by a pilot who holds at least a private pilot certificate  
and is otherwise qualified in accordance with the provisions  
of the Civil Air Regulations.
